

Numeracy and Literacy through Coding and Robotics

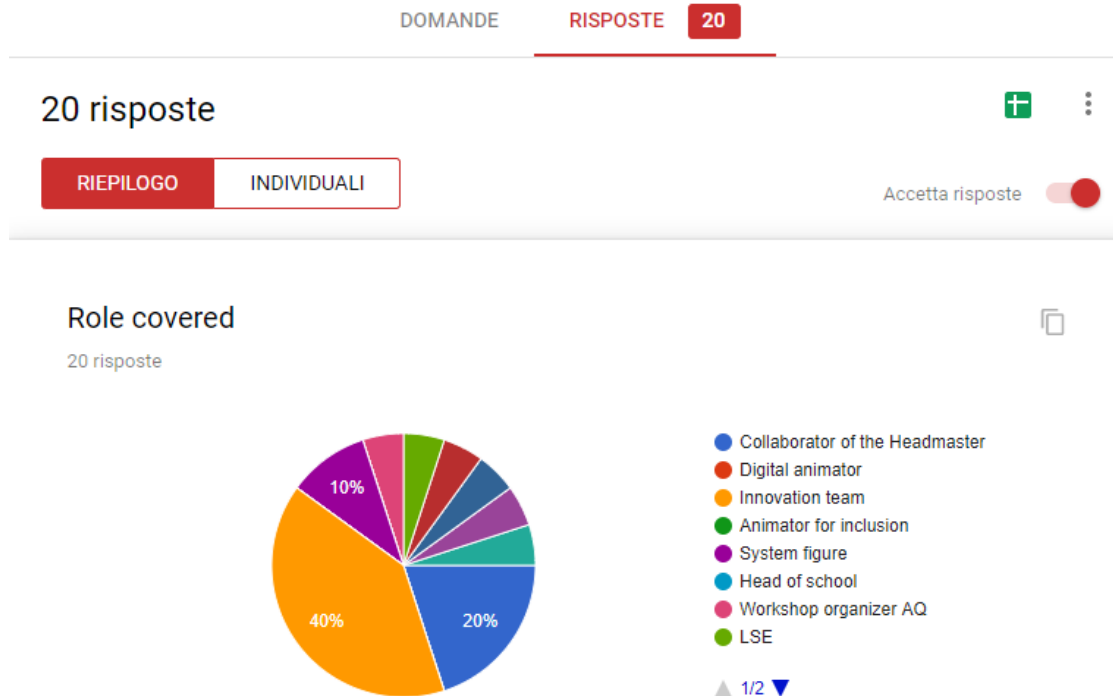

Feedback from Questionnaire:
Mobility in Portugal
18th – 21st November 2019

St Nicholas College
Rabat Primary

Feedback from Questionnaire

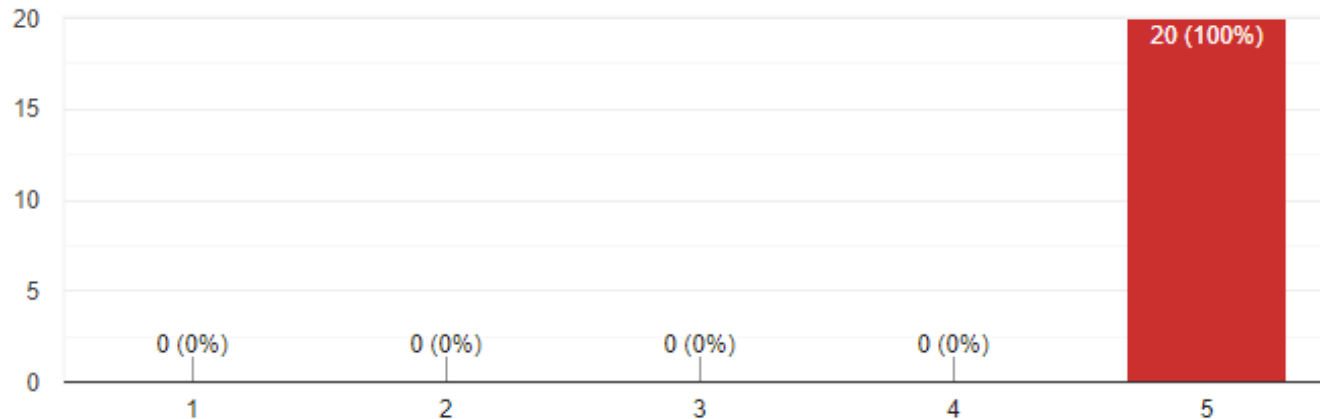

- From the pie chart above one can see that this course targeted educators from various strata ensuring better dissemination!

Feedback from Questionnaire

Did you like the location of the mobility ?

20 risposte

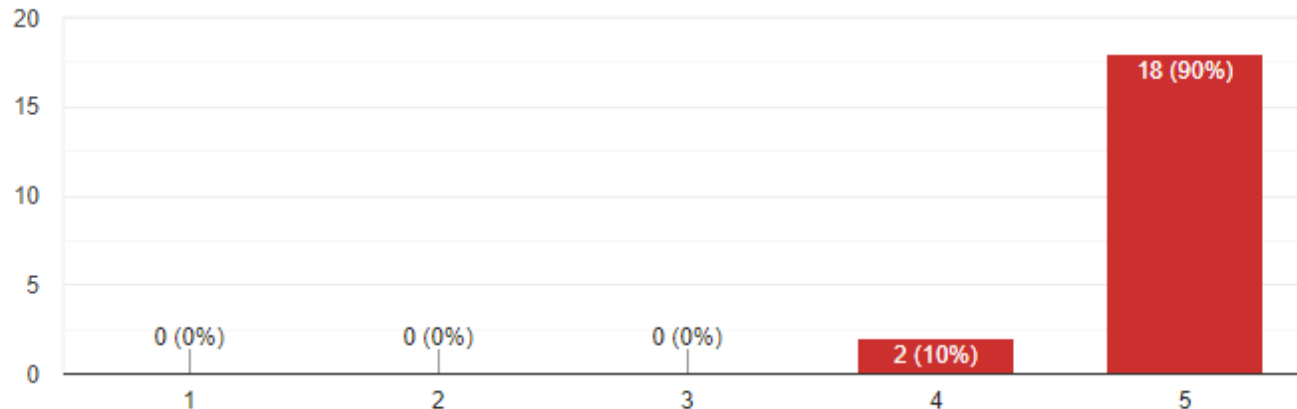

- All of the participants strongly agree that the location of the course was suitable!

Feedback from Questionnaire

Adequacy of the equipment available

20 risposte

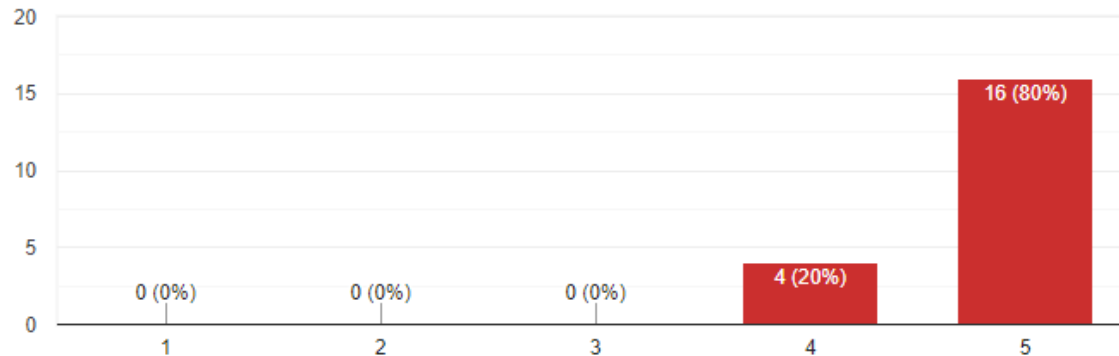

- All participants agreed that the equipment used was very adequate.

Feedback from Questionnaire

Functionality and comfort of the rooms used

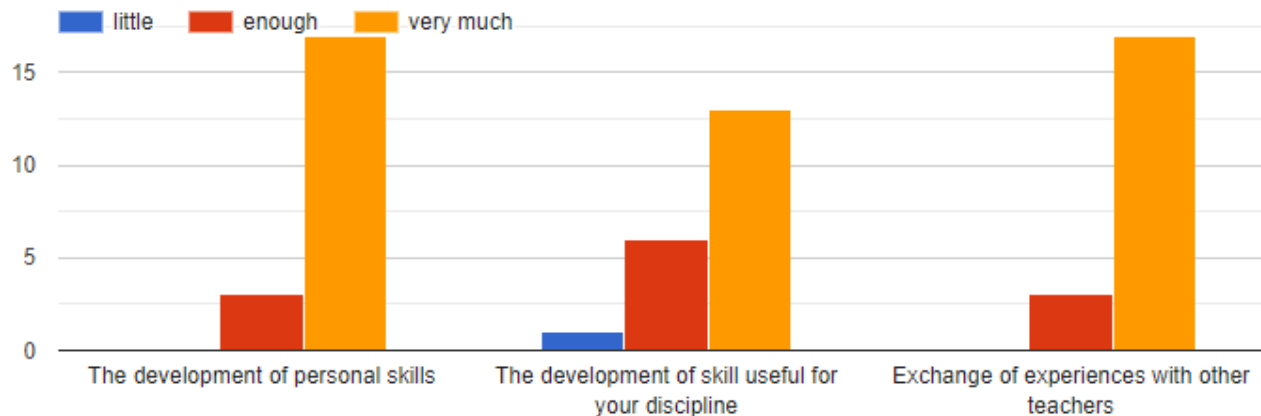

20 risposte

- Participants were pleased or very pleased with the content of the course and the functionality and comfort of the rooms used.

Feedback from Questionnaire

What kind of benefits did you receive from this mobility?

- The majority of the participants agreed that this mobility served to develop personal skills, skills to be used in their teaching and learning and also provide a great platform for educators to share experiences with other teachers.

Feedback from Questionnaire

The participant expresses a judgment on

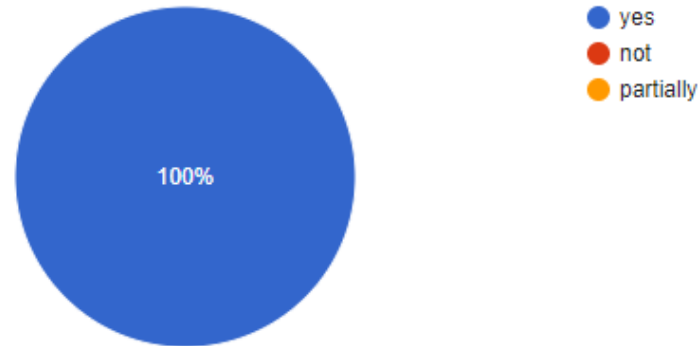

- All participants were pleased or very pleased with the course content, training received in line with objectives and professional interest together with the applicability of course content in school curricula.

Feedback from Questionnaire

Has the choice of contents, methodologies and objectives of the mobility been adequately shared?

20 risposte

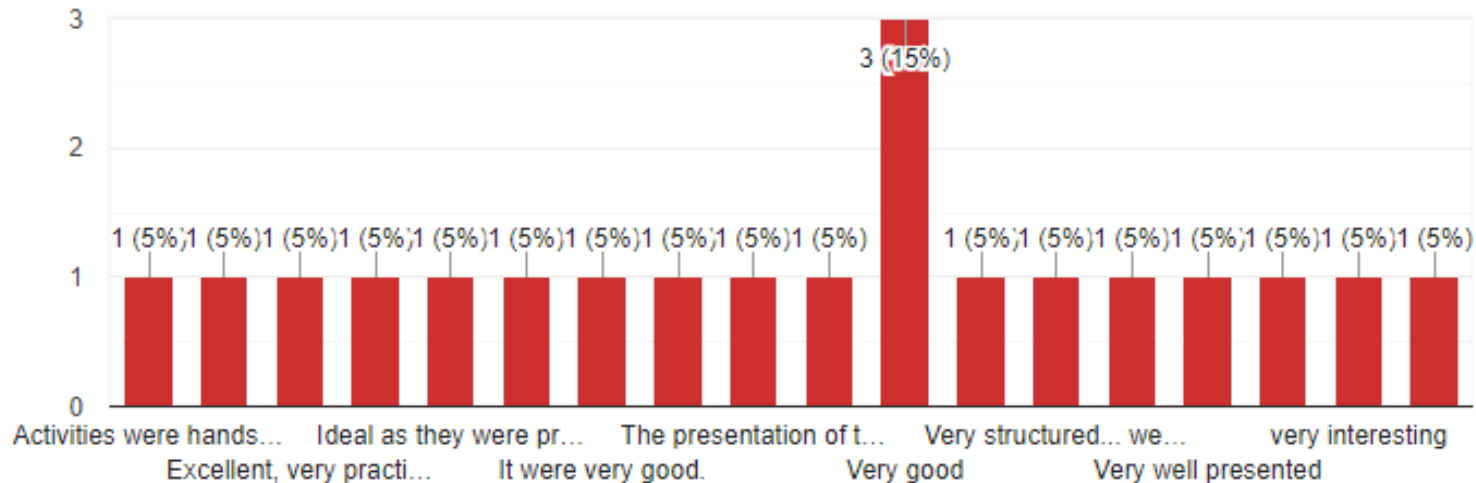

- All participants agreed that everything was adequately shared. Participants were provided with links to websites and other relevant material.

Feedback from Questionnaire

How do you judge the presentation of the activities?

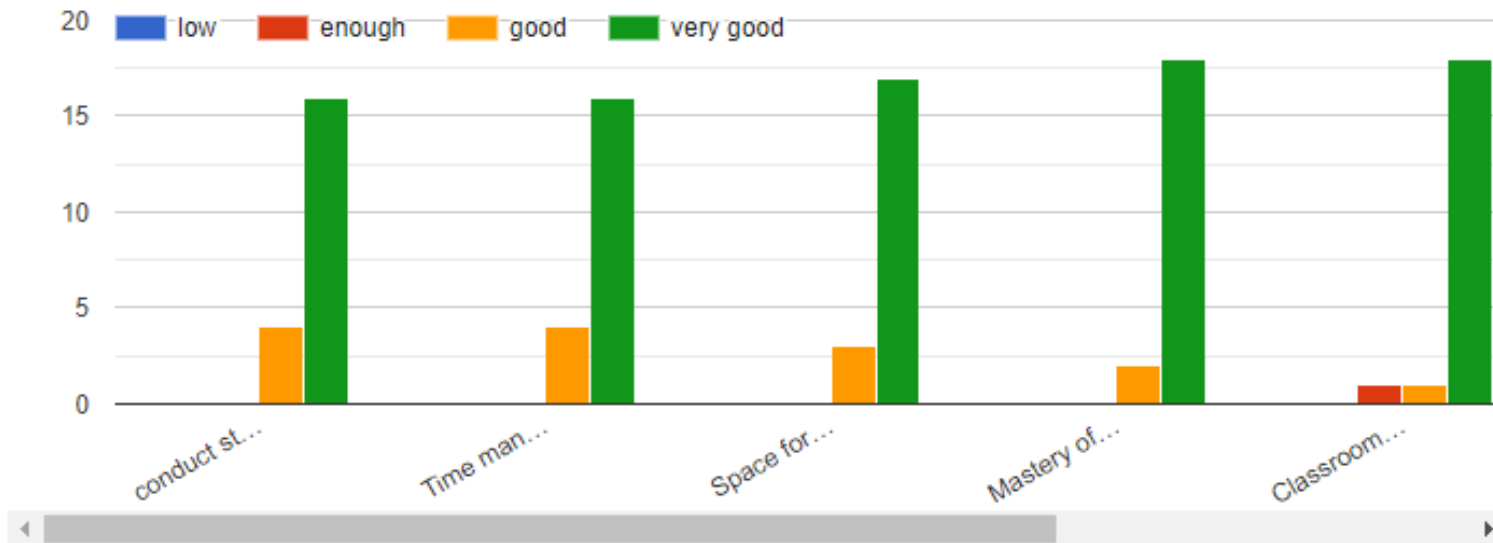

20 risposte

- Activities were presented allowing time for participants to ask, evaluation, reflect and share good practice. Tutors were well prepared using good classroom management skills.

Feedback from Questionnaire

Please, express your assessment with respect to the following elements characterizing the teaching 

- The course was well planned making good use of time management, providing time for hands-on activities, while allowing participants time to share good practice.

Feedback from Questionnaire

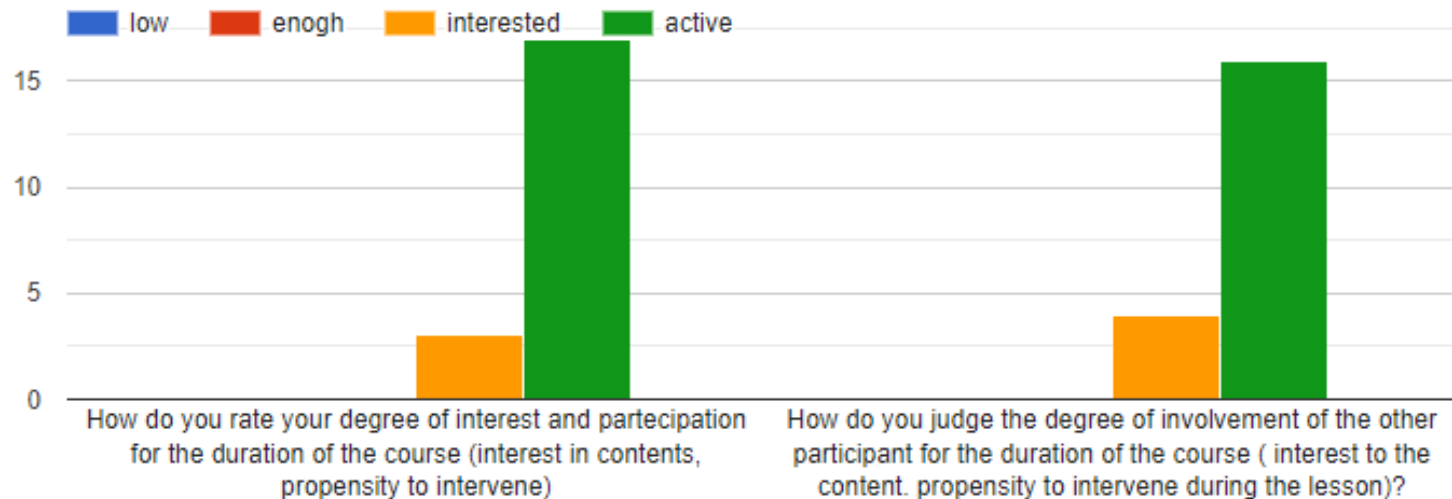

Teaching materials

- The teaching material was considered to be good or very good by all participants providing sufficient resources which can be used for future reference.

Feedback from Questionnaire

The trainee expresses a judgment on:

- The participants found the course very interesting. There was a good momentum which progressed well from one activity to another allowing time for participants to practice and discuss further.

Feedback from Questionnaire

Was the mobility :

20 risposte

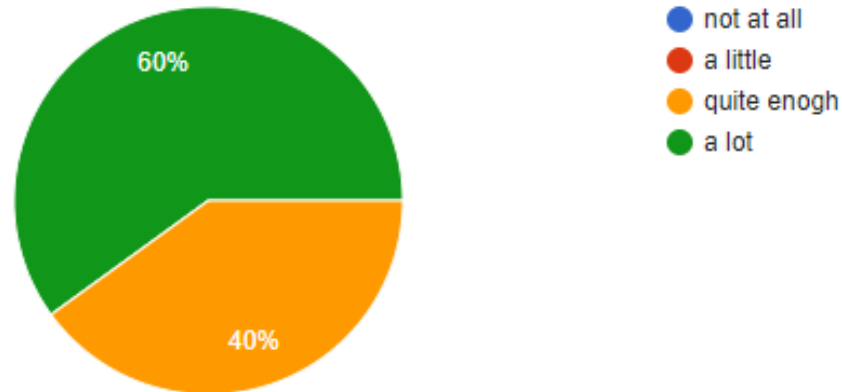

- All participants agreed that the course was adapted to their individual needs, thanks for the preparation of the tutors prior to the commencement of this course.

Feedback from Questionnaire

What has been learned in the mobility is applicable in your activity?

20 risposte

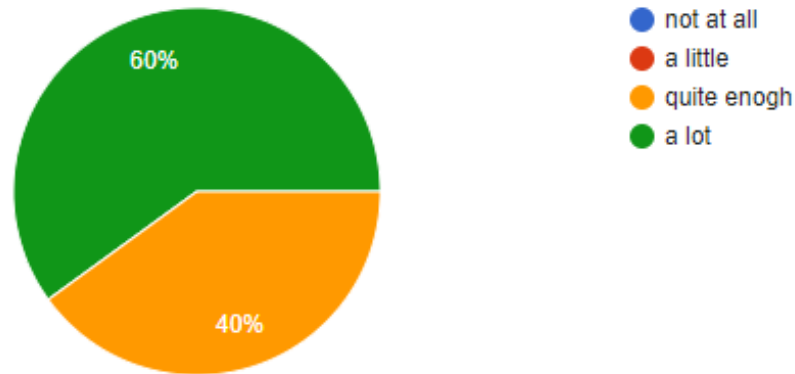

- The pie chart above is evidence of the success of this course where participants valued that what has been learned can be applied in their teaching experience.

Feedback from Questionnaire

Did the training activity provide for a continuous even autonomus verification of the skills acquired?

20 risposte

- The course gave participants a very good platform where to try out and verify skills acquired.

Which suggestions would you give to improve the effectiveness of collaboration between schools?

20 risposte

Create a international lesson plano ir product

Everything was very well done.

More use of twinspace from all group mobilities and help in using it more effectively.

More moments of sharing experiences

Classroom activities with students practicing.

All the portuguese teachers envolved in the project should be in training sessions, if possible

continue with the collaborative dynamics developed until now

None

In order to improve the collaboration between schools, I think it would have been better if we introduced ourselves first (our names, schools, our profession, teaching grade, etc). This would determine our similarities and differences between schools :).

The collaboration between the schools was very efficient, maybe a short presentation from each country about their good practices in schools would have been appreciated.

20 risposte

and differences between schools :).

The collaboration between the schools was very efficient, maybe a short presentation from each country about their good practices in schools would have been appreciated.

Nothing, all goes well

It would be good for schools to share good practices all the time.

List of equipment available in all schools so everyone can share common ideas

I would have no suggestions to make, as I found a high level of professionals

Continue in the same way as it is a productive one

we could prepare more concrete lessons and publish them in tweenspace

The ideal would be to have more frequent opportunities for comparison

With the lessons learned build new features for use in the classroom

No suggestions.

more sharing of classroom work.

Are there any issues that you would like to be addressed in the future in order to enrich the exchange between colleagues?

20 risposte

No.

Mixed teams

Yes.

N/a

share more resources

There are times of sharing practices with students.

there are no problems to solve

None

It was a fruitful experience. However, I think that for next time, it would have been more interesting if we had more time to visit primary classrooms, rather than kindergarten classrooms only.

My experience was a fruitful one and it will be beneficial for my students too. I am now more aware of technological tools and have ample time to observe and do hands-on activities. I encourage teachers to participate and promote mobilities as you will have a lot of time to reflect on your own practices.

No

How to encourage other teachers to start using new technologies.

Address more children aged between 6 years to 10 years

I didn't find any problems

Everything is ok.

/

The most effective method for learning English

I do not feel that there are problems with collaboration. It is a very strong working group and happy to work in a team.

I would like to see more classroom work shares.

Special thanks to Lucia Tocco for preparing the Questionnaire!
